

# Stefan Condeescu

Junior Software Engineer | Python, Java & SQL | Backend and Data Systems

Bucharest, Romania | Open to remote opportunities | [stefan.condeescu@gmail.com](mailto:stefan.condeescu@gmail.com) | [GitHub](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Junior Software Engineer and master's student in Database Systems for Business with practical experience in Python, SQL, data validation, and database-backed applications. During a Python internship, processed millions of IoT telemetry records using SQLite, JSON parsing, timestamp conversion, anomaly checks, and CSV reporting. Built full-stack and data applications and contributed a merged bug fix with regression tests to the open-source Frictionless library.

## EDUCATION

**Master's Degree in Database Systems for Business (BDSA) - In Progress**, Faculty of Economic Cybernetics, Statistics and Computer Science, Bucharest University of Economic Studies | Sep 2026 - Jul 2028 (expected)

**Bachelor's Degree in Economic Informatics**, Faculty of Economic Cybernetics, Statistics and Computer Science, Bucharest University of Economic Studies | Sep 2023 - Jul 2026

**Relevant coursework:** Databases, OOP in Java, Data Structures, Web Technologies, Statistics, Data Analysis, Machine Learning, GoF Design Patterns

## TECHNICAL SKILLS

**Programming:** Python, Java, SQL, PL/SQL, JavaScript, C/C++, Bash

**Backend and web:** Node.js, Express, React, REST APIs, JWT

**Data and databases:** PostgreSQL, SQLite, Oracle SQL, pandas, NumPy, Streamlit, Plotly, scikit-learn

**Engineering:** Git/GitHub, Docker, Render, Postman, unittest, JUnit

## EXPERIENCE

**Python Developer Intern - SC Digital Software SRL** | Bucharest, Romania | Mar 2025 - May 2025

- Built Python scripts to validate millions of IoT smart-bin records stored in SQLite by parsing JSON payloads, converting hexadecimal timestamps, and comparing extracted values with historical data.
- Implemented checks for zero, out-of-range, extreme, and rapidly changing readings, and identified missing time intervals.
- Exported flagged readings and missing data to CSV reports, turning raw telemetry into reviewable data-quality outputs.

**Accounting Intern - 360 Online Accounting SRL** | Bucharest, Romania | Jul 2025 - Sep 2025

- Supported accounting workflows using SAGA, working with balances, document organisation, and archive maintenance.

## PROJECTS & OPEN SOURCE

**Frictionless - Open-source contribution**

Python, data validation, automated testing | [Merged PR #1799](#)

- Fixed schema/header mismatch handling to prevent redundant cell errors during validation and added regression tests for validation and analysis workflows.

**MacroSense - Python analytics and ML application**

Python, Streamlit, PostgreSQL, pandas, scikit-learn, unittest | [GitHub](#)

- Built a PostgreSQL-backed application with authentication, nutrition, activity and weight tracking, analytics dashboards, a What-if simulator, automated tests, and a leakage-aware ML pipeline for 14/30-day weight prediction.

**PresenceBoard - Full-stack attendance platform**

React, Node.js, Express, PostgreSQL, JWT, REST APIs | [GitHub](#)

- Built a QR attendance application with organizer authentication, recurring events, duplicate protection, live attendance views, CSV export, and a smoke test covering the main user flow.

## CERTIFICATIONS & LANGUAGES

**Oracle Academy:** Database Design and Programming with SQL; Database Programming with PL/SQL

**Cisco Networking Academy:** JavaScript Essentials 1 & 2

**Languages:** Romanian - Native; English - Advanced (IELTS 8.0, Cambridge FCE C1)
